INTERESTS

- Performance Analysis and System Architecture
- GUI Design
- Game Design
- Data Structures and Algorithms
- Web Design
- Software Engineering

SKILLS

- Mobile App Developer
- Designed and implemented several algorithms
- Knowledgeable with the Microsoft Office suite
- Developed programs using Python, Java, C, C#, C++, HTML, CSS and JavaScript
- Experienced in creating software documentation according to the software development life cycle

EDUCATION

Hudson Valley Community College

80 Vandenburg Ave, Troy NY 12180

2019-2021

AS in Computer Science

GPA 3.14

University at Albany

1400 Washington Ave, Albany, NY 12222

2022-Present

BS in Computer Science

GPA 2.25

EXPERIENCE

- Proficient in Java and Python for 5+ years.
- Built a journaling system using Python and C++.
- Developed and launched an android mobile app on the Google Play store using Java and XML.
- Implemented the Awk text processing language in Java.
- Built an operating system simulator in Java.

Leadership

- Managed a group of 5 people including myself where we assigned a group project on the ethical implications of computing.
- Helped manage a group of 5 people including myself where we built and documented a web app like Quizlet that used a MongoDB server for the back end along with JavaScript, Nodejs, and CSS for the front end.
- I worked along with another person, and we developed a simple web server using the C programming language.
