RB

SHEIKH O.F BIN-NABI (RUSHO)

**COMPUTER SCIENTIST | WEBSITE:
HTTPS://RUSHOBINNABI.GITHUB.IO**

INTERESTS

- Performance Analysis and System Architecture.

- GUI Design.

- Game Design.

- Data Structures and Algorithms.

- Web Design.

SKILLS

- Mobile App Developer.

- Created a personal website.

- Developed various programs in Python, Java, C, C#, C++.

- Implemented the AWK text processing language in Java.

- Worked with several algorithms.

- System Architecture: Performance Analysis.

- Knowledgeable with using the Microsoft Office suite.

EXPERIENCE

- Proficient in Java and Python for ~5 years.

- Used ~1 months' worth of skills to create a website using HTML and CSS with JavaScript for some backend functionality.

- Made a super simple, bare bones journaling system in Python and C++.

- Developed and launched a mobile app using Java and XML for Android on the Google Play store. The app gets worked on whenever I have new ideas to test and implement and if I find bugs.

VOLUNTEER EXPERIENCE OR LEADERSHIP

- Managed a group of 4 or 5 people including myself where we were assigned a group project on the ethical implications of computing.

- Developed a piece of software with a group of 5 people including myself where we had to come up with and create software documentation and used a MongoDB server along with Javascript, NodeJs, and CSS code to build a web app like Quizlet.

- Me and another person worked on and developed a simple web server using the C programming language.
